

WE CELEBRATE 25 YEARS OF SUCCESS

Dear Readers,

I would like to start this year by wishing a happy and healthy 2019 and thanking you for your continued loyalty to our solutions and systems. 2018 has been a rewarding year in many ways, but in particular, it has been especially dear to my heart and the hearts of our employees as more clients than ever have experienced movement owing to our actuators. That means more independent people with greater mobility, more ergonomic support in working environments and more automated maintenance-free turnkey solutions.

When developing a new linear solution, our engineers take into consideration all sorts of specifications regarding reliability, safety, durability, appearance, comfort and energy efficiency. Starting with technical challenges, every achievement is the result of careful study and teamwork. This is why our sales have been rising continuously across Europe and the US. We are naturally very pleased with this business development, all the more since we celebrate 25 years of success this year by delivering innovative solutions.

This is definitely something that we can't help but be filled with pride and excitement about what we have achieved and what's yet to come. We are going to reiterate our commitment to greater quality and strengthening our present infrastructure. The many measures we are already working on include getting involved in more and more research projects focused on custom-made control motion systems, delivering a new website and an online shop which will now also address to German speaking countries like Switzerland, Austria and Germany as well as employing more professionals notably in electronics and computer science engineering.

We will do all we can in 2019 to provide smooth movement and reliable service that REGNER[®] clients are accustomed to.

Once again, our sincerest best wishes for a great 2019! And keep experiencing movement with us.

Kurt Regner
President

YEARS OF INNOVATION
